

[A Compendium of Miniature Orchid Species](#)

by Ron Parsons and Mary E. Gerritsen

With 2270 pages and over 3080 incredible photographs, this book set covers 500 miniature orchid species across more than 117 genera, as well as photos (with cultural information) of an additional 500 species that were not presented in the first edition. Multiple images of each species illustrate the color variations, and there are hundreds of photographs taken in situ. In addition to detailed entries of the individual species, you will find information on growth habits, shapes of pseudobulbs, leaves etc, habitats, and a meticulously detailed chapter on miniature orchid culture. If you love miniature orchids, you will enjoy a visual feast within these volumes!

\$250 for the four volumes - Paid at Orchid Fest - **Orders Due August 5**
